AHMED JAMA

07526742874

Professional Summary

Versatile and highly motivated IT professional with a strong foundation in computer hardware, software development, web and mobile application development, and technical support. Experienced in building, configuring, and troubleshooting computer systems, while also developing responsive websites, user-focused applications, and fullstack solutions using modern technologies. Skilled in diagnosing technical issues, optimizing system performance, and providing clear guidance to users across various technical areas. Demonstrates strong problem-solving abilities, effective communication, and the ability to adapt quickly to new tools and frameworks. Committed to delivering high-quality solutions, maintaining best practices in coding and documentation, and contributing effectively in dynamic IT and development environments.

Work Experience

CUSTOMER SERVICE Sep 2024 – Present

IKEA | Milton Keynes

- Worked on the tills, so I have a good knowledge of operating tills such as processing sales, exchanges, and refunds.
- Delivered high-quality customer service in a fast-paced retail environment, assisting customers with order queries, product availability, and returns.
- Granted secure till access, enabling me to process transactions, handle payments, and manage refunds - reinforcing my understanding of user authentication, access control, and system permissions in real-world IT environments.
- Navigated IKEA's internal systems to retrieve customer orders, update inventory status, and troubleshoot order discrepancies - applying logic and data handling skills aligned with database and front -end interfaces.
- Collaborated with team leads to resolve technical issues at the till, including system freezes and barcode errors, drawing on my problem-solving mindset and familiarity with UI/UX troubleshooting.
- Developed strong interpersonal and multitasking abilities while balancing customer needs with operational efficiency.

IT ASSISTANT Jul 2024 – Aug 2024

Brunel Univeristy | London Uxbridge

- Completed an internship at Brunel University as a Web Developer and IT Assistant.
- Supported 1st- and 2nd-year Computer Science students with assignments and laboratory work.
- Assisted students in networking, cybersecurity, web development, app development, and game development.
- Developed and maintained responsive, user-friendly websites using modern web technologies.
- Provided technical troubleshooting for software, hardware, and network-related issues.

- Explained complex technical concepts clearly and helped students understand practical tasks.
- Demonstrated strong problem-solving, communication, and teamwork skills.

CATERING OPERATIVE May 2022 – Oct 2022
DNATA | Stanstead Airport

- Picked, packed, and organised food and beverage items for aircraft based on flight schedules and digital manifests.
- Used handheld scanning devices and internal tracking systems to record inventory data, monitor stock accuracy, and update system logs in real time.
- Operated electronic systems and barcode tools to trace stock movements, troubleshoot scanning errors, and verify digital records.
- Followed detailed procedures to ensure accuracy and compliance with health and safety standards - reinforcing strong attention to detail and process discipline.
- Collaborated with warehouse and airside teams to meet flight deadlines, communicating effectively to resolve order or data discrepancies.
- Identified and reported faulty or missing stock using data reports, demonstrating analytical and problem-solving skills.
- Gained experience with digital inventory systems, data validation, handheld hardware, and structured workflows requiring precision and accountability.

CALL HANDLER Jun 2021 – Oct 2021
NHS

- Provided front-line support for NHS Test and Trace, managing high call volumes during the COVID-19 pandemic while maintaining confidentiality and accuracy.
- Logged patient and case data using secure digital systems (Salesforce and NHS internal portals), ensuring data integrity and compliance with GDPR regulations.
- Used ticketing and CRM platforms to record queries, escalate cases, and follow up on reports, demonstrating accuracy and system navigation skills.
- Guided callers through COVID testing, isolation procedures, and system registration processes with empathy and clarity.
- Troubleshot user access and account verification issues, supporting callers in navigating online forms and government platforms.
- Collaborated with team leads via internal communication tools (Teams, Outlook, and live chat systems) to ensure smooth workflow and accurate case updates.
- Maintained consistent service quality while working remotely, showing strong self-management, technical adaptability, and reliability under pressure.

Education

BSC (HONS) IN COMPUTER SCIENCE Sep 2021 – Sep 2024
Brunel University

A LEVELS IN IT & BUSINESS Sep 2019 – Aug 2021
Luton College | Luton

GCSE Jan 2014 – Jan 2019
Barnfield West Academy

Skills

Time Management, Java, JavaScript, Spring, React.js, C#, C++, SQL, HTML, MySQL, Networking Fundamentals, Microsoft 365 Suite

QUALIFICATIONS

- Bachelor of Science Degree
- 7 GCSE
- Diploma In IT * Business

PROJECTS

- Flight Seat Booking (Java GUI Application)–
- Designed and developed a Java GUI application for a flight booking system, enabling users to select seats and book tickets.
- Used UML diagrams and pseudocode to guide system design and implementation.
- Implemented text-file data management to prevent duplicate seat bookings and improve reliability.
- Performed JUnit testing to ensure robustness and error-free performance.
- Collaborated with team members to integrate features smoothly and resolve functionality issues.
- Feeding London Web Application (Full Stack Development) –
- Contributed to building a full-stack web app addressing the UN SDG goal of Zero Hunger, using React.js, Java, and MySQL.
- Pitched project concepts effectively during presentations to tutors.
- Acted as Scrum Master and Product Owner, leading sprint planning and ensuring timely task delivery.
- Developed front-end features in React.js, including posting discounted food adverts and managing user profiles.
- Integrated the React front end with a Spring Boot backend, ensuring efficient communication with the MySQL database.
- Used Git version control for code management, branching, and smooth integration with other team features.
- Ocean Wave – Educational Game (C# & Unity)-
- Led the development of an educational game focused on waste disposal and recycling using C# and Unity for the final-year project.
- Managed project timelines using a personal Scrum methodology to ensure timely completion.
- Communicated ideas effectively to supervisors and markers, both verbally and in written reports.
- Created intuitive game UIs and used UML diagrams for system visualization.
- Improved gameplay iteratively based on user testing and self-evaluation.
- Conducted a comprehensive user-based evaluation, receiving positive feedback on the game's educational impact.

- Coding Learning Platform – Full-Stack Web Application-
- Designed and built a full-stack coding education platform using React, HTML, CSS, JavaScript, Spring Boot, and MySQL.
- Developed an interactive React front end with guided tutorials, component examples, state management exercises, and routing.
- Implemented client-side CRUD functionality (fetch/Axios) to interact with backend APIs in real time.
- Built a RESTful API with Spring Boot for lessons, user progress tracking, and code snippet management using POST/GET/PUT/DELETE operations.
- Designed and tested MySQL database schemas, including tables for users, lessons, exercises, and progress tracking.
- Used Eclipse/IntelliJ for backend development and Postman for API validation and testing.
- Integrated front end and back end securely, validating inputs and returning meaningful HTTP status responses.
- Managed code collaboration using Git/GitHub, including branching, pull requests, and merges.
- Applied Agile methodology, creating user stories, planning sprints, and iterating based on feedback.
